SUMMARY

Self-motivated recent graduate in BBA-CA with a growth mindset. Eager to learn and contribute fresh perspectives in a challenging environment. Committed to utilizing my knowledge and intelligence to drive the organization's success.

PROJECTS:

Online Art Gallery

- Leveraged HTML,CSS, Bootstrap and PHP to build a full-stack online art gallery for artist and art enthusiasts.
- Enhanced knowledge of front-end development, backend functionalities(art registration, artwork management, customer management, artwork wishlist),database management(MySql).
- Developed the project by integrating user interface design, back-end logic, and database interaction to create a functional online platform.

Yatri-Mitr:Tourism Management System

- Utilized Java, JSP, HTML, CSS, JavaScript to design and develop a comprehensive tourism management system.
- Expanded knowledge in database management (tourist information, booking, hotel booking. transport),user interface design (trip planning tools), and back-end functionalities (transport booking, room booking, user registration, user-login, admin login processes).
- Constructed the system by integrating data storage, user interaction elements, and processing logic to create a streamlined tourism experience.
